Specifications

Technical specifications

- Starting time: 0,2 s
- Power factor: 0,6
- Mercury content: 1,5 mg
- Rated power: 8 W
- Wattage: 8 W
- Lifetime of lamp: 10 year(s)
- Rated lifetime: 10 year(s)
- Wattage equivalent: 40 W
- Lamp dimension (width): 44,4 mm
- Lamp current: 60 mA
- Color rendering index (CRI): 82
- Lamp dimension (height): 107 mm
- Lumen: 435
- Rated luminous flux: 435 lm
- Color temperature: 2700 K
- Number of switch cycles: 5000
- Lifetime of lamp: 10000 hour(s)

- Rated lifetime: 10000 hour(s)
- Lumen maintenance factor: 0.7 (at the end of the nominal lifetime) %
- Voltage: 220-240 V
- Warm up time 60% light output: 5 - 30 s
- Energy efficiency label: A
- Fitting/Cap: E27
- Dimmable: No
- Shape: Stick
- Color: Warm White
- Light effect / finish: White
- Wattage standard bulb: 40 W

Cleaning by breakage/disposal

- Cleaning: Follow the advice for proper clean up*
- Disposal: Follow the instruction for disposal as special waste**

Highlights

Saves up to 80% energy

This bulb saves 80% energy compared to your standard bulb. It pays for itself and saves you money year after year. So reduce your energy bill and start saving Now, just by turning the switch.

10 years lifetime saves money

Energy saving lamps have a longer lifetime than standard bulbs. With these 10 years lifetime, one energy saver replaces 10 standard bulbs. So they save money and last longer, year after year. The lifetime is based on the average usage of 2,7 hrs per day or 1.000 hrs a year. This average is influenced by the usage during different seasons (dark winter vs light summer), the weather conditions (sunny vs rainy dark day) and on the room where the lamp is used (short usage in bathroom vs long usage in living room).

Rapid start

Waiting a while before the lamp reaching its maximum output is history with our rapid starting energy efficient lamps.

* Breaking a lamp is extremely unlikely to have any impact on your health. If a lamp breaks, ventilate the room for 30 minutes and remove the parts, preferably with gloves. Put them in a closed plastic bag and offer it to the local waste facilities for recycling. Do not use a vacuum cleaner.

** Compact fluorescent lamps have to be treated as special waste, they must be offered to the local waste facilities for recycling. The European Lighting Industry has set up an infrastructure, capable of recycling mercury, other metals, glass, etc.
