

## Multi-Lite invests in UV-C virus protection at its headquarter

Our employees are our greatest asset. In order to protect them and to reduce the risk of infection and the spread of viruses / bacteria as much as possible, Multi-Lite has now installed UV-C tubes for air disinfection in the entrance area and in the conference room.

These UV tubes are not only efficient and low-maintenance, they can also be easily integrated thanks to their modern, unobtrusive design and are available in white and black. Thanks to the included lamps and easy commissioning, they are ready for immediate use.

### **With light against germs**

According to the latest medical findings (Robert Koch Institute), infection via aerosol particles is the main way of spreading SARS-CoV-2.

Another reason for the rapid spread of Covid-19 is the long survival time of the virus on surfaces and objects. UV-C radiation is an effective disinfectant for air, surfaces and water. All bacteria and viruses tested so far react to UV-C disinfection, including the SARS-CoV-2 virus.

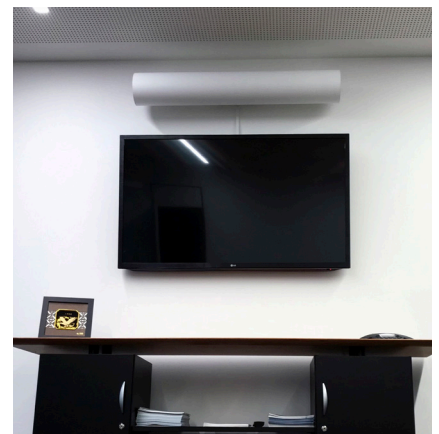

### **Diverse areas of application**

Multi-Lite carries a large selection of UV-C products from various brand manufacturers for the disinfection of air and surfaces. There are many possible uses: The UV-C lights are suitable for use in offices, hospitals, medical practices, as well as in retail, hotel and hospitality, in schools and grocery stores.

Would you like **advice** on UV-C lights? We can currently offer you special prices for selected products (Osram AirZing “10-for-9-Deal”). Our employees look forward to your call on 040-66993060.

**!!!** Caution: UV-C lamps emit strong UV radiation, which can cause sunburn and conjunctivitis. Skin and eyes must therefore not be exposed to radiation.

MULTI-LITE GMBH is an official German distributor for OSRAM, LEDVANCE, PHILIPS, TUNGSRAM and SYLVANIA lamps and as such takes over the whole warranty handling in any case of damaged or defect lamps or early failure.

*New and efficient: the UV-C tubes in the entrance area and in the conference room of the Multi-Lite company headquarters.*
