

Light is trust
SIRIUS HRI[®] – verify the
authenticity of your product

Light is OSRAM

OSRAM

Trust OSRAM SIRIUS HRI®

At OSRAM, we aim to always provide products of highest quality and maximum satisfaction for our customers who choose to buy original OSRAM lamps. OSRAM monitors all quality and performance aspects of its products as carefully as possible, because only an original OSRAM product performs like an OSRAM original. And you wouldn't settle for anything less, would you?

In recent years, we have seen a rising number of products which try to copy not only certain parts of our products but also our name, our logo and our packaging. For customers around the world, especially those purchasing SIRIUS HRI® lamps, this means a lack of certainty regarding the originality of our products.

You might have seen product piracy in other areas before. Some of them are easy to spot, yet some are not. When it comes to OSRAM products, some of those fakes are so good that neither you nor a professional's eye can spot the difference. As we have reached a stage where you cannot trust your eyes anymore, we want you to know that you can however trust OSRAM.

That's why we have developed the Trust SIRIUS HRI® online tool, enabling you to authenticate our lamps by easily checking the unique lamp code on the reflector of the lamp. As you would expect from OSRAM, you will get an instant result you can trust.

To check if you've purchased a genuine OSRAM SIRIUS HRI® lamp, simply visit www.osram.com/trust-sirius and enter the unique serial code which you can find on the reflector.

Serial code

The 11-digit serial code can be found on the label on the reflector of the lamp, for example 4305K04LR4F. Please enter the serial code without any blank spaces.
